EXPERIENCE

- **Amazon Web Services** New York, NY
Software Development Engineer I — Amazon Connect *June 2022 - Aug 2023*
 - **Enhanced API Performance:** Optimized SearchCases API, resolving pagination issues and improving search efficiency, reducing response time by 30%.
 - **Secure Network Setup:** Implemented PrivateLink for secure VPC connectivity, improving client security and monitoring with CloudWatch.
 - **Automated Release Process:** Streamlined SDF generation and SDK testing, reducing manual effort and improved auto-generation process.
 - **DevOps and Monitoring:** Built CI/CD monitoring with CloudWatch, ensuring reliable deployments and fast incident response.
 - **On-call Leadership:** Resolved high-severity incidents and maintained service health through proactive monitoring and postmortems.
 - **Technologies:** Java, TypeScript, AWS, Node.js, Mockito, Guice
- **Accenture** Remote
Data Scientist Intern *May 2020 - July 2020*
 - **Teleworking Forecast Map:** Collaborated with SEPTA to develop a machine learning model predicting bus route usage during and after COVID-19, achieving accurate forecasts by 15%.
 - **Data Preprocessing:** Cleaned and processed large datasets, improving model training speed by 25%.
 - **Technologies:** Python, Pandas, PyTorch, Keras
- **Nittany AI Alliance** University Park, PA
AI Associate - Data Scientist *Oct 2019 - July 2020*
 - **NLP Model Development:** Built and maintained a Named Entity Recognition (NER) model with 93% accuracy for automating transcript parsing for college admissions.
 - **Model Optimization:** Fine-tuned model parameters, increasing data extraction accuracy and processing speed by 20%.
 - **Technologies:** Python, spaCy, OpenCV, AWS S3, AWS Textract

PROJECTS

- **Mira — Job Application Auto-Filler:** Built a Chrome extension that auto-fills job applications across Ashby, Greenhouse, and Lever. Fine-tuned a MiniLM classifier for field detection, implemented a multi-phase fill pipeline with React event simulation, and designed a responsive side panel UI with React 19 and Tailwind CSS.
- **3D Portfolio Website:** Designed, modeled, and developed an interactive 3D portfolio from scratch. Built custom Blender assets, implemented WebGL rendering with React Three Fiber, and added smooth animations with GSAP and Framer Motion.
- **NER Transcript Parser:** Developed an AI-powered Named Entity Recognition (NER) model with 93% accuracy, automating high school transcript parsing for college admissions.

CERTIFICATES & LICENSES

- **Google Cybersecurity Specialization** Cert ID: UNA5DNWVDA69
Coursera *Feb 2024*

PROGRAMMING SKILLS

- **Languages:** Python, Java, TypeScript, SQL
- **Technologies:** AWS (DynamoDB, S3, CloudWatch, CloudFormation), Git, Linux, Docker, Node.js

EDUCATION

- **Penn State University** University Park, PA
Coursework in Computational Data Science
